

Andreas Mai studied physics at the technical university of Cottbus. He received his diploma in 2006 and joined the IHP process integration group in the same year. Main task was the development of RF-LDMOS transistors in a 130nm SiGe-BiCMOS technology. He received his PhD in 2010 and became a project leader for the technical coordination, yield enhancement and technology stabilization of IHPs MPW-technologies. In 2013 he became the group leader of the "Process Integration" group at IHPs technology department. Since beginning of 2015 he has the position as "Technology-Department Head" with the main responsibilities for operation and service activities at IHP.
